

## SCHOOL OF SCIENCE & ENGINEERING

build an  
**INSTITUTION** that  
inspires **INNOVATION**

LUMS is establishing a School of Science and Engineering modeled on the best research universities in the world. This new school will be housed in a purpose-built 6-story 300,000 sq-ft building complex on the existing LUMS campus. It comprises state-of-the-art teaching and research laboratories, classrooms, offices and other learning spaces. Plans for this complex have been drawn up and construction is expected to begin shortly. We are now seeking outstanding and dynamic individuals to manage the construction of this modern building complex.

### ▪ PROJECT MANAGER

The individual will report to the General Manager (A&S) and be responsible for successful and timely completion of the project. Responsibilities will include project planning, monitoring progress, controlling costs, interpreting contract documents, coordinating with contractors/consultants, ensuring quality, and verifying invoices. The individual should have a degree in engineering, preferably civil, with at least seven years of construction experience, including substantial experience in handling large-scale, multi-story projects. The candidate should have excellent communication skills and be proficient with relevant computer software.

### ▪ SITE ENGINEER

The individual will report to the Project Manager and be responsible for supervising civil construction in line with specifications, measuring quantities and checking invoices. The individual should have a diploma in civil technology, preferably with ten years of relevant experience. The candidate should have good communication skills and be computer proficient.

Both positions are for 3 years with the possibility of becoming permanent upon project completion. Salary will depend on the individuals' abilities and experience. Given the size and complexity of the project it is a unique opportunity to develop one's professional skills.

---

Please submit your resume, clearly indicating the position applied for, preferably via email to:

General Manager, Administration & Services  
Email: [construction@lums.edu.pk](mailto:construction@lums.edu.pk)

Applications must be received by October 15, 2005.
